

SpadeWorx listed amongst the Top 10 Most Promising IT Services companies

By SpadeWorx Software Services

Dated: Mar 08, 2010

SpadeWorx Software Services has been listed by SiliconIndia as amongst the ‘Top 10 Most Promising IT Services companies to watch out in 2010’.

According to the panel of experts at SiliconIndia, the Top 10 gems of the IT services industry were selected considering their unique business ideas as well as with the respect to their technology, adoption and market proposition. The experts have also noted that these companies have the momentum and will rise above the best.

The Top 10 List was selected from amongst the thousands of nominations received from companies in hot domains such as, business analytics, user centric software solutions, cloud-computing service providers and consulting.

The listing is another feather in the cap for SpadeWorx which has also been selected by Nasscom as amongst the Top 50 Emerging Companies for 2009.

Founded in 2007, SpadeWorx’s focus is to integrate techniques of building rich “User Experience” and techniques of software engineering. The company has pioneered the “User Centered Software Engineering™” (UCSE™) methodology to design and develop software solutions that are relevant and contextual to the end users.

SpadeWorx has developed rich, powerful business and consumer applications for companies in domains such as Financial Services, Healthcare, Telecom, Retail, Media & Entertainment and Manufacturing.

In the short span of three years SpadeWorx has built a strong customer base across different verticals. Some of the key clients include Fortune 100 organizations such as Microsoft and HP as well leading Indian organizations such as Reliance, Mahindra Group and Reserve Bank of India.
